**TENDER FOR SUPPLY OF AIR QUALITY MONITORING EQUIPMENT.**

*(Women Enterprises)*

Dated: 23<sup>rd</sup> March, 2023

**Clarification No.1.**

In accordance with the **Tender for Supply of Air Quality Monitoring Equipment**, KenGen issues **Clarification No.1** as follows:

No.	BIDDERS CLARIFICATION	KenGen's RESPONSE
1	According to the price schedule, there are 2 separate items. However, most of our potential suppliers are quoting for one single item that can test for both gases. Is it okay for us to quote for one gas analyser that can test for both gases if it complies to the technical specifications? Kindly advise.	There are several air quality parameters targeted by the specified equipment, with the key ones being hydrogen sulphide and mercury vapour in air. Bidders quoting for a standalone equipment with the capability for all the air quality parameters and in the required quantity will be considered, provided the equipment satisfactorily meets the technical requirements.

**ACKNOWLEDGEMENT OF CLARIFICATION No.1**

We, the undersigned hereby certify that the clarification is an integral part of the document and the alterations set out in the clarification have been incorporated in the tender proposal.
