TENDER FOR SUPPLY OF GOVERNOR VALVES FOR OLKARIA II POWER STATION

(Citizen Contractors)

Dated: 21st March, 2024

Clarification No.1.

In accordance with the **Tender for Supply of Governor Valves for Olkaria II Power Station**, KenGen issues **Clarification No.1** as follows:

	BIDDERS CLARIFICATION	KenGen’s RESPONSE
1.	We wish to clarify if TR4, as stated, would require just a confirmation (Y/N) that one would submit both hard and soft copies of said Manual at the Award Stage. Alternatively, if a copy is required for the evaluation stage, then it is only a soft copy since this is an electronic bid submission. Kindly advise since the way it is currently written, TR4 does not make sense for an electronic bid submission (as far as hard copy requirement).	TR 4 requires confirmation that the bidder will submit hard and soft copies of the manuals once they are awarded; therefore, a Y/N response is sufficient. The manuals (hard and soft) are pertinent sources for the valves' design, operation, and maintenance information.

SUPPLIER ACKNOWLEDGEMENT OF CLARIFICATION NO.1

We, the undersigned hereby certify that the Clarification No.1 is an integral part of the document and the alterations set out in clarification has been incorporated in the Tender Proposal.
