TENDER FOR PROVISION OF CATERING AND HOUSEKEEPING SERVICES FOR GEOTHERMAL DRILLING STAFF FIELD ACCOMMODATION FACILITIES/CAMPS

(Citizen Contractors)

Dated: 16th March, 2023

Clarification No.1.

In accordance with the **Tender for Provision of Catering and Housekeeping Services for Geothermal Drilling Staff Field Accommodation Facilities/Camps**, KenGen issues a **Clarification No. 1** as follows:

No.	BIDDERS CLARIFICATION	KenGen's RESPONSE
1	As mentioned in the tender document, meals are served during the day and nights. This being a KWS zone where movements at night are restricted, please clarify how the contractor will be able to deliver meals during the nights without breaking the KWS laws.	KenGen operations run for 24hrs, 7days a week. As such, there are no movement restrictions in and around our project sites. However, the contractor should make the necessary arrangements to pay any fees liable to the KWS so that they are allowed unrestricted entry and exit into the park area.
2	KenGen 2 Rig as advised during the site visit that this Rig is still in Ethiopia and soon will relocate to Kenya, in terms of logistics, please clarify under which base camp it will be and the distance from the base camp to the rig sites.	KenGen 2 Rig camp will be combined with the pre-existing camp in Olkaria/Eburru depending on the area of its operation. This should not affect anything as we have unit rates for all the various services being offered. KenGen rig sites are dynamic as they change from time to time. However, they usually operate at a radius of 16kms from the rig camps.

SUPPLIER ACKNOWLEDGEMENT OF CLARIFICATION NO.1

We, the undersigned hereby certify that the Clarification No.1 is an integral part of the document and the alterations set out in Clarification has been incorporated in the Tender Proposal.
