36.5 In case of an abnormally high tender price, the Procuring Entity shall make a survey of the market prices, check if the estimated cost of the contract is correct and review the Tender Documents to check if the specifications, scope of work and conditions of contract are contributory to the abnormally high tenders. The Procuring Entity may also seek written clarification from the tenderer on the reason for the high tender price. The Procuring Entity shall proceed as follows:

- i) If the tender price is abnormally high based on wrong estimated cost of the contract, the Procuring Entity may accept or not accept the tender depending on the Procuring Entity's budget considerations.
- ii) If specifications, scope of work and/or conditions of contract are contributory to the abnormally high tender prices, the Procuring Entity shall reject all tenders and may retender for the contract based on revised estimates, specifications, scope of work and conditions of contract, as the case may be.

36.6 If the Procuring Entity determines that the Tender Price is abnormally too high because genuine competition between tenderers is compromised (*often due to collusion, corruption or other manipulations*), the Procuring Entity shall reject all Tenders and shall institute or cause relevant Government Agencies to institute an investigation on the cause of the compromise,

before retendering.

**37. Post-Qualification of the Tenderer**

### **2. Requirements**

- 2.1 The Government of Kenya requires that all parties including Procuring Entities, Tenderers, (applicants/proposers), Consultants, Contractors and Suppliers; any Sub-contractors, Sub-consultants, Service providers or Suppliers; any Agents (whether declared or not); and any of their Personnel, involved and engaged in procurement under Kenya's Laws and Regulation, observe the highest standard of ethics during the procurement process, selection and contract execution of all contracts, and refrain from Fraud and Corruption and fully comply with Kenya's laws and Regulations as per paragraphs 1.1 above.

A few of the provisions noted below highlight Kenya's policy of no tolerance for such practices and behavior:

    - b) if a contract has already been entered into with the person, the contract shall be voidable;
  - 4) The voiding of a contract by the procuring entity under subsection (7) does not limit any legal remedy the procuring entity may have;

  - 6) An employee, agent or member described in subsection (1) who refrains from doing anything prohibited under that subsection, but for that subsection, would have been within his or her duties shall disclose the conflict of interest to the procuring entity;
  - 7) If a person contravenes subsection (1) with respect to a conflict of interest described in subsection (5)(a) and the contract is awarded to the person or his relative or to another person in whom one of them had a direct or indirect pecuniary interest, the contract shall be terminated and all costs incurred by the public entity shall be made good by the awarding officer.   - v) “obstructive practice” is:

“fraudulent practice” includes a misrepresentation of fact in order to influence a procurement or disposal process or the exercise of a contract to the detriment of the procuring entity or the tenderer or the contractor, and includes collusive practices amongst tenderers prior to or after tender submission designed to establish tender prices at artificial non-competitive levels and to deprive the procuring entity of the benefits of free and open competition.

## **SECTION V - SCHEDULE OF REQUIREMENTS**

### **1. GENERAL INFORMATION AND REQUIREMENTS**

KenGen intends to procure two new hydro turbine runners for one of its hydro power stations located in Kenya on river Tana, namely Kamburu Power Station. The purpose of the procurement is to:-

- Provide Kamburu Power Station with two new hydro turbine runners that will operate well under the existing operating conditions efficiently and without cracking.
- Guaranteed reliable performance of the runners without adverse effects of cavitation.

#### **1.1 INTRODUCTION**

Kamburu Hydro-Power station is situated about 180km Northeast of Nairobi and was commissioned in the year 1973/74 with an installed capacity of 94.2 MW (3x31.4) Vertical Francis turbines. The three units were rehabilitated from 2018 to 2019. The rehabilitation included installation of new stainless-steel guide vanes with clutches, installation of new cooling system, upgrade of the excitation system, rewinding of the stator and installation of new rotor poles, installation of new 415V switch gear and servicing of the three main inlet valves.

The station is currently running on second generation runners, the initial ones having been replaced due to extensive cavitation and frequent runner blade cracking. The current turbine runners, especially of Unit 1 and Unit 2 still experience frequent runner cracking at the crown. Unit 3 runner has not been experiencing the same phenomenon but has had some cavitation signs. In situ repairs have not been able to eliminate the problems and the units have to be stopped repeatedly for the works.

## **2. DETAILED TECHNICAL SPECIFICATIONS**

### **2.1 Scope**

The project will consist of design, engineering, manufacture, factory testing and transportation to site of two new hydro turbine runners complete with integral wearing rings.

All works and equipment that are necessary for the execution of the project at site shall be the responsibility of the tenderer.

### **2.2 General Description/ Overview of Existing System**

Kamburu Hydro-electric Plant has been in operation since 1974 when unit 1 and 2 were commissioned

followed by unit 3 in 1975. The units have run well over the years but the impact of wear and tear has been felt on various turbine components calling for their refurbishment, which is currently underway, to ensure continued reliability.

The turbine runners of Unit 1 and Unit 2 have especially been experiencing a unique phenomenon, unrelated to age, of cracking at the runner crown. Unit 3 runner has been observed with slight cavitation effects.

### **2.3 Requirements of the New Runners**

The new runners shall be designed to adapt and fit perfectly in the existing arrangement and for continuous and efficient operation throughout the runners' operating range of 14 to 35MW. They shall be designed so as to ensure the undesirable cracking phenomenon, described above, shall not occur again. They shall also be designed to eliminate the undesirable cavitation effects. The contractor shall carry out any modification required on the stationary parts to ensure runner blades cracking and cavitation are eliminated. These modifications shall be documented, and their effects demonstrated in the tender.

New Francis runners shall be supplied. The runners shall have the following main features:

- The runner shall be made from 13/4 or 16/5 CrNi stainless steel quality or better, well suited for site repairs by welding. The Tender shall contain all relevant information of the make, grade and properties of proposed material.
- If a welded construction is proposed, the entire runner, i.e. vanes, runner band and crown shall be made of the specified material.
- The runner cone bolted to the runner hub shall also be of stainless-steel quality.
- The upper and lower wearing rings shall be an integral part of the runner. A proposal with wearing rings shrunk on the runner is not acceptable.
- The existing/spare stationary wearing rings shall be reused. The integral wearing rings shall have a hardness of at least 50 Brinell points higher than the stationary wearing rings.
- Blade surface finish shall be  $R_a = 1.6 \mu\text{m}$  or better.
- Runner form and dimensions shall be according to IEC Publication 193 - International Code for Model Acceptance Tests for Hydraulic Tur-bines (with amendments).
- In the case of cast construction, the runner shall have no casting defects exceeding the requirements to be given by the turbine supplier in the quality sheets from the standard CCH 70-2. All acceptance criteria shall be agreed before award of contract.
- The proposed runner shall not result with increased hydraulic load.
- The runner shall be balanced according to ISO 1940-1973 G 6.3.
- 

New coupling bolts shall be supplied for the coupling of the runner to the turbine shaft. The new coupling bolts shall be designed for installation using hydraulic tensioning and shall be supplied complete with the

tensioning equipment. Tensioning procedure shall be documented and demonstrated.

The tenderer and any of his personnel or agents will be granted permission by the Employer for the purpose of inspection of turbine parts to assist in the design of the new runners. This shall be only upon the express condition that the tenderer, his personnel or agents, will release and indemnify the Employer from and against all liability in respect of personal injury (whether fatal or otherwise), loss of or damage to property and any other loss, damage, costs and expenses however caused, which but for the exercise of such permission, would not have arisen.

The Contractor shall guarantee the turbine runner against excessive metal removal caused by pitting due to cavitation, for a period of two years from the date of issue of the Operational Acceptance Certificate, provided that the turbine during the guarantee period is operated within normal operating range as stated by the Contractor in the Technical Schedules. The guarantee shall be given in accordance with IEC Publication 60 “Cavitation pitting evaluation in hydraulic turbines, storage pumps and pump turbines”. The runners shall also be guaranteed against cracking during this period.

Under these guarantees the Contractor shall bear the cost of repairing damage caused by cracking or excessive pitting due to cavitation, and of making any modifications required in the turbine parts to prevent recurrence of these defects. If the repair of the cracks or removal of the pitting require dismantling or transporting of the runner, the Contractor shall be responsible for all costs incurred. Damaged areas shall be repaired by welding and grinding as necessary and restored to a smooth surface that will prevent further cracking or pitting. If cracking or excessive pitting recurs after the runner has been repaired/modified, the Contractor shall be obliged to replace the runner with a new redesigned, satisfactory one. If the runner is repaired or replaced, the guarantee period for the repaired or new runner shall be prolonged according to the Conditions of Contract.

b) an increase in the Contract Price; but results in a reduction in life cycle costs due to any benefit described in

(a) to (d) above, the amount to be paid to the Supplier shall be the full increase in the Contract Price.

337 Subject to the above, no variation in or modification of the terms of the Contract shall be made except by written amendment signed by the parties.

#### **34. Extensions of Time**

341 If at any time during performance of the Contract, the Supplier or its subcontractors should encounter conditions impeding timely delivery of the Goods or completion of Related Services pursuant to GCC Clause 13, the Supplier shall promptly notify the Procuring Entity in writing of the delay, its likely duration, and its cause. As soon as practicable after receipt of the Supplier's notice, the Procuring Entity shall evaluate the situation and may at its discretion extend the Supplier's time for performance, in which case the extension shall be ratified by the parties by amendment of the Contract.

342 Except in case of Force Majeure, as provided under GCC Clause 32, a delay by the Supplier in the performance of its Delivery and Completion obligations shall render the Supplier liable to the imposition of liquidated damages pursuant to GCC Clause 26, unless

an extension of time is agreed upon, pursuant to GCC Sub-Clause 34.1.

## 35. Termination

### 35.1 Termination for Default

- a) The Procuring Entity, without prejudice to any other remedy for breach of Contract, by written notice of default sent to the Supplier, may terminate the Contract in whole or in part:

### 35.2 Termination for Convenience.

- a) The Procuring Entity, by notice sent to the Supplier, may terminate the Contract, in whole or in part, at any time for its convenience. - b) The Goods that are complete and ready for shipment within twenty-eight (28) days after the Supplier's receipt of notice of termination shall be accepted by the Procuring

### **37. Export Restriction**

37.1 Notwithstanding any obligation under the Contract to complete all export formalities, any export restrictions attributable to the Procuring Entity, to Kenya, or to the use of the products/goods, systems or services to be supplied, which arise from trade regulations from a country supplying those products/goods, systems or services, and which substantially impede the Supplier from meeting its obligations under the Contract, shall release the Supplier from the obligation to provide deliveries or services, always provided, however, that the Supplier can demonstrate to the satisfaction of the Procuring Entity that it has completed all formalities in a timely manner, including applying for permits, authorizations and licenses necessary for the export of the products/goods, systems or services under the terms of the Contract.
